Subject: Building Notes

Wapakoneta Middle School has had a January and February full of excellent learning experiences, highlighted by the teaching and learning that is happening daily in the classrooms. Teachers have been meeting in Teacher Based Teams weekly to discuss student progress, identify student needs, and implement strategies in their classrooms that will improve student performance.

I would also like to thank the students and staff for their participation in the paper product drive to help Mercy Unlimited. It will continue to run until Friday of this week and, again, looks to be a huge success. Mrs. Teresa Riffle deserves a special thank you for organizing the event.

Finally, 7th grade students visited the Armstrong Air & Space Museum earlier this month. This was the first such trip for WMS and the students were excited to be able to tour the museum, watch a movie, and participate in interactive opportunities that match our 7th grade science standards. We are so fortunate to have such a wonderful resource in our very own backyard. A special thanks to Mrs. Phyllis Lisi for organizing the field trip.
